## **Election/Restrictions**

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
    - I. Claims 1-8 and 43-66, drawn to foreground/background insertion, classified in class 348, subclass 586.
    - II. Claims 9-42, drawn to image segmentation using color, classified in class 382, subclass 164.
  - The inventions are distinct, each from the other because of the following reasons:
  - Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as replacing an image background in a video sequence; while invention II utilizes color to segment an image.
- See MPEP § 806.05(d).

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
